REFERENCE LIST

Pre-clinical studies are available separately.

Sedation ICU/NIV/Post-op

Health economy

Delirium/Sleep/EEG

Absalom AR, Menon DK.
BIS and spectral entropy monitoring during sedation with midazolam/remifentanil and dexmedetomidine/remifentanil.

Boyer J.
Treating agitation with dexmedetomidine in the ICU.

Dexmedetomidine and the reduction of postoperative delirium after cardiac surgery.

Prevalence of delirium with dexmedetomidine compared with morphine based therapy after cardiac surgery: a randomized controlled trial (DEXmedetomidine COMpared to Morphine-D Excom Study).
Anesthesiology. 2009;111:1075-84.

Electroencephalogram spindle activity during dexmedetomidine sedation and physiological sleep.

Assessing the depth of dexmedetomidine-induced sedation with electroencephalogram (EEG)-based spectral entropy.

The correlation between the Richmond agitation-sedation scale and bispectral index during dexmedetomidine sedation.

Effects of dexmedetomidine or methylprednisolone on inflammatory responses in spinal cord injury.

MacLaren R.
Immunosedation: a consideration for sepsis.

Sanders RD, Hussell T, Maze M.
Sedation & immunomodulation.

Results of a pilot study on the effects of propofol and dexmedetomidine on inflammatory responses and intraabdominal pressure in severe sepsis.

Comparative effects of propofol vs dexmedetomidine on cerebrovascular carbon dioxide reactivity in patients with septic shock.

The effects of dexmedetomidine on human neutrophil apoptosis.

Withdrawal/Drugs & alcohol

Belgrade M, Hall S.
Dexmedetomidine infusion for the management of opioid-induced hyperalgesia.

Darrouj J, Puri N, Prince E, et al.
Dexmedetomidine infusion as adjunctive therapy to benzodiazepines for acute alcohol withdrawal.

Dexmedetomidine as an adjuvant in the treatment of alcohol withdrawal delirium: a case report.

Dexmedetomidine in the treatment of withdrawal syndromes in cardiothoracic surgery patients.

Sepsis/Anti-inflammatory responses

Yuki K, Soriano SG, Shimaoka M.
Sedative drug modulates T-cell and lymphocyte function-associated antigen-1 function.

Pandharipande PP, Sanders RD, Girard TD, et al.
Effect of dexmedetomidine versus lorazepam on outcome in patients with sepsis: an a priori-designed analysis of the MENDS randomized controlled trial.
Crit Care. 2010;14:R38.

Neuro-intensive care/Neurosurgery

Drummond JC, Sturaitis MK.
Brain tissue oxygenation during dexmedetomidine administration in surgical patients with neurovascular injuries.

Farag E.
Dexmedetomidine in the neurointensive care unit.
Penney R.  
Use of dexmedetomidine and ketamine infusions during scoliosis repair surgery with somatosensory and motor-evoked potential monitoring: a case report.  
AANA J. 2010;78:446-50.

Remifentanil-propofol vs dexmedetomidine-propofol—anesthesia for supratentorial craniotomy.  

The effect of dexmedetomidine on perioperative hemodynamics in patients undergoing craniotomy.  

Piccioni F, Fanzio M.  
Management of anesthesia in awake craniotomy.  
Minerva Anestesiol. 2008;74:393-408.

Rozet I.  
Anesthesia for functional neurosurgery: the role of dexmedetomidine.  

Advantageous effects of dexmedetomidine on haemodynamic and recovery responses during extubation for intracranial surgery.  

Frost EA, Booij LH.  
Anesthesia in the patient for awake craniotomy.  
Curr Opin Anaesthesiol. 2007;20:331-5.

Aryan HE, Box KW, Ibrahim D, et al.  
Safety and efficacy of dexmedetomidine in neurosurgical patients.  

Dexmedetomidine does not increase the incidence of intracarotid shunting in patients undergoing awake carotid endarterectomy.  

The effects of dexmedetomidine/remifentanil and midazolam/remifentanil on auditory-evoked potentials and electroencephalogram at light-to-moderate sedation levels in healthy subjects.  

Rozet I, Muangman S, Vavilala MS, et al.  
Clinical experience with dexmedetomidine for implantation of deep brain stimulators in Parkinson’s disease.  

Tanskanen PE, Kyttä JV, Randell TT, et al.  
Dexmedetomidine as an anaesthetic adjuvant in patients undergoing intracranial tumour surgery: a double-blind, randomized and placebo-controlled study.  

Bekker A, Sturaitis MK.  
Dexmedetomidine for neurological surgery.  

Dexmedetomidine for awake carotid endarterectomy: efficacy, hemodynamic profile, and side effects.  

Mack PF, Perrine K, Kobylarz E, et al.  
Dexmedetomidine and neurocognitive testing in awake craniotomy.  

The use of dexmedetomidine infusion for awake craniotomy.  

Dexmedetomidine decreases cerebral blood flow velocity in humans.  

Pharmacokinetics

Pharmacokinetics of prolonged infusion of high-dose dexmedetomidine in critically ill patients.  

Iirola T, Vilo S, Manner T, et al.  
Bioavailability of dexmedetomidine after intranasal administration.  

Panzer O, Moitra V, Sladen RN.  
Pharmacology of sedative-analgesic agents: dexmedetomidine, remifentanil, ketamine, volatile anesthetics, and the role of peripheral mu antagonists.  

Iirola T, Laitio R, Kentala E, et al.  
Highly variable pharmacokinetics of dexmedetomidine during intensive care: a case report.  
J Med Case Reports. 2010;4:73.

Feld JM, Hoffman WE, Stechert MM, et al.  
Fentanyl or dexmedetomidine combined with desflurane for bariatric surgery.  

Venn RM, Karol MD, Grounds RM.  
Pharmacokinetics of dexmedetomidine infusions for sedation of postoperative patients requiring intensive care.  

The pharmacokinetics of dexmedetomidine in volunteers with severe renal impairment.  
Ebert TJ, Hall JE, Barney JA, et al.
The effects of increasing plasma concentrations of dexmedetomidine in humans.
Anesthesiology. 2000;93:382-94.

Reduction of the minimum alveolar concentration of isoflurane by dexmedetomidine.
Anesthesiology. 1997;86:1055-60.

Pharmacodynamics
(including anti-shivering and diuresis)

Usta B, Gozdemir M, Demircioglu RI, et al.
Dexmedetomidine for the prevention of shivering during spinal anesthesia.

Weant KA, Martin JE, Humphries RL, et al.
Pharmacologic options for reducing the shivering response to therapeutic hypothermia.

Gerlach AT, Dasta JF, Steinberg S, et al.
A new dosing protocol reduces dexmedetomidine-associated hypotension in critically ill surgical patients.

Drummond JC, Dao AV, Roth DM, et al.
Effect of dexmedetomidine on cerebral blood flow velocity, cerebral metabolic rate, and carbon dioxide response in normal humans.

Dexmedetomidine infusion is associated with enhanced renal function after thoracic surgery.

Talke P, Stapelfeldt C, Lobo E, et al.
Effect of alpha2B-adrenoceptor polymorphism on peripheral vasoconstriction in healthy volunteers.
Anesthesiology. 2005;102:536-42.

Cardiovascular and parasympathetic effects of dexmedetomidine in healthy subjects.

Venn RM, Bryant A, Hall GM, et al.
Effects of dexmedetomidine on adrenocortical function, and the cardiovascular, endocrine and inflammatory responses in post-operative patients needing sedation in the intensive care unit.

Reversal of the sedative and sympatholytic effects of dexmedetomidine with a specific alpha2-adrenoceptor antagonist atipamezole: a pharmacodynamic and kinetic study in healthy volunteers.
Anesthesiology. 1998;89:574-84.

Rouch AJ, Kudo LH, Hebert C.
Dexmedetomidine inhibits osmotic water permeability in the rat cortical collecting duct.

Dexmedetomidine does not alter the sweating threshold, but comparably and linearly decreases the vasoconstriction and shivering thresholds.
Anesthesiology. 1997;87:835-41.

Rapid reversal of alpha 2-adrenoceptor agonist effects by atipamezole in human volunteers.

Gynecology/Aesthetics

McQueen-Shadfar LA, Megalla SA, White WD, et al.
Impact of intraoperative dexmedetomidine on postoperative analgesia following gynecologic surgery.

Dexmedetomidine: an alternative for epidural anesthesia in tension-free vaginal-tape surgery.

Wasiluk IM, Castillo D, Panni JK, et al.
Postpartum analgesia with dexmedetomidine in opioid tolerant during pregnancy.

Comparison between dexmedetomidine and midazolam for sedation of eclampsia patients in the intensive care unit.

Dexmedetomidine for awake fiberoptic intubation in a parturient with spinal muscular atrophy type III for cesarean delivery.

Intravenous dexmedetomidine as an adjunct for labor analgesia and cesarean delivery anesthesia in a parturient with a tethered spinal cord.

Dexmedetomidine as a substitute for remifentanil in ambulatory gynecologic laparoscopic surgery.

Elvan EG, Oc B, Uzun S, et al.
Dexmedetomidine and postoperative shivering in patients undergoing elective abdominal hysterectomy.
Taghinia AH, Shapiro FE, Slavin SA.

O’Daniel TG, Shanahan PT.

Reviews/Meta-analyses

Tan JA, Ho KM.
